

Conclusion

(Last paragraph)

Deeper Understanding of the Thesis (Rewrite your thesis without repeating yourself exactly).

What is the author's ultimate message, and how does the author help the reader to see this message? (In 1-3 sentences, review the major points raised in the essay and link them to your thesis).

How should the author's ultimate message influence the way readers think and act (as a society and individually)?

As a Society

- Think about how our government and current laws support this theme and what changes also need to be made.
- Think about our education system and what schools and parents should teach kids about the world, relationships, and values connected to this theme.
- Think about our relationships and attitudes as an entire country with the rest of the world.
- How might the media and other major influences to the development of our identities support this theme (and what changes might need to be made)?

Individually

Think about in your day to day lives

- with your relationships and interaction with others
- how you respond to certain situations
- what you can individually do to make a difference now and/or in the future
